

Korbin's Steak Express

Serving a niche market by promoting, selling, and delivering Korbin's Steak Express consisting of different grilling meat pack options is this business's "Big Idea." Living in northeast South Dakota, near Big Stone Lake, many summer lake cabin residents travel from a distance or surrounding communities to spend the weekend or summer at Big Stone Lake. Having to bring their summer grilling meat or stop at a local grocery store can be an inconvenience.

The Urban Garden

The Urban Garden will primarily serve the urban population by growing and distributing fresh, quality produce through hydroponics and vertical farming. Farm-fresh produce in large cities is uncommon, and the cost is high. For many people, this creates a barrier to an essential part of a healthy lifestyle. With the assistance of our trailblazing technology and research, we strive to equip the urban population with the nutritious food essential to a healthy lifestyle.

Smart Rides

Is it 3 o'clock and you can't pick up your child from school? Is your child needing help with homework? Are they direly hungry after school? Smart Rides can help you out. Smart Rides is a driving service to/from school or extra-curricular activities when parents aren't able to do so. We offer extra amenities such as; having a snack in the car after school, last minute rides, and tutoring/homework help after pickup.

Wild Yarrow Design

Millennials are currently the largest consumer group in the Unites States, are comfortable shopping online, and are more focused on products or services that provide experiences. I intent to launch a company that allows customers to buy flowers direct form the growers, prepackaged, and ready for arrangement assembly. These packages will arrive at the consumer's door with a QR code that will take them to a YouTube video that will guide them through assembly.

Hoffman Manure Hauling

Hoffman Manure Hauling will serve northeast South Dakota cattle feedlots and cattle producers. It will service the livestock producers who cannot afford manure hauling equipment or have the man power to haul their own manure. Most livestock producers do not have the time or resources to haul manure making Hoffman Manure Hauling a convenient option to deal with the problem of excess manure.

CattleHome Fencing

During today's hustle and bustle of everyday life, it can be difficult for ranchers to find the time to meet all the needs of their industry. Some might say that fencing is one of the more time-consuming aspects of being a cattle owner. With CattleHome Fencing, we aim to help relieve some of the stress that accompanies being a rancher by building fences for residents in the local and surrounding areas.

Vandy's Lawn Care

Vandy's Lawn Care will start in the Big Stone City, South Dakota. We will start in our neighborhood where homeowners like to have their yards looking nice. That's where Vandy's Lawn Care comes in. I'm looking for people getting too old to mow, people with large families that don't have time to mow, or people that don't have the equipment to mow. Also the lake homes give us another opportunity.

New Home

An app that allows people to go to another's house for a nice home cooked meal. It will solve the problem of college kids and young adults getting homesick and/or getting sick of university food by providing them an alternative that is made with time, love, and in most cases healthier.
